Summary

Fullstack developer student skilled in building web applications using React, Tailwind CSS, Material UI, TypeScript, Redux Toolkit, Node.js, Express, and MongoDB. Passionate about creating clean UI/UX and efficient backend systems.

Skills

Frontend: React, Material UI, Tailwind CSS, TypeScript, Redux Toolkit

Backend: Node.js, Express, MongoDB (Mongoose), APIs, CRUD, jwt, OAuth

Projects

E-commerce Store – Built with TypeScript. Includes user authentication, a database for purchases & favorites, and secure user data.

What I learned:

Frontend: Learned how to use **Redux Toolkit** for state management, and implemented a **filtration system** to easily retrieve elements.

Backend: Gained experience with **Google OAuth integration**, **JWT authentication**, **data validation**, and building secure **sign-in & sign-up flows**.

Task App(Under Development) – – This feature allows users to organize and save groups of tasks that are either similar or variations of each other inside a folder.

What I learned:

Frontend: Learned how to design a **To-Do List app** with a clean and user-friendly interface.

Backend: Learned how to build the **correct database structure** for the app, and planned additional features such as:

1. Task delay/postponing
2. Task prioritization
